

Local Holdings Maintenance Statistics Available Through OCLC's Usage Statistics Web Site

Did you know you can view statistics on your Local Holdings Maintenance usage through the OCLC Usage Statistics web site? Local Holdings Maintenance statistics offer a detailed electronic report of your monthly use of OCLC Local Holdings. You access the statistics at <<http://www.stats.oclc.org/>>.

You can also follow a link directly from Connexion browser and client. OCLC Usage Statistics for Local Holdings maintenance provides reports which include information about online edits to local holdings records as well as number of records added and deleted. Reports are sorted by "add," "update," and "delete."

Reports:

Two reports are available:

Local Holdings Maintenance Summary Report

Local Holdings Maintenance Detail Report

The summary report provides the total number of Local Holdings records added, updated and deleted in the period chosen. The detail report provides record by record information including OCLC record number, action taken (add, update, or delete) and the date.

Agents:

Did you know this site provides information for you to monitor your work done on behalf of your client institutions?

Through OCLC Usage Statistics, agents can view two reports:

Local Holdings Maintenance Agent Summary Report

Local Holdings Maintenance Agent Detail Report

The summary report provides an institution by institution view giving the name of the institution and total number of records added, updated and deleted in the time frame selected. The Detail report breaks this information down to the record level giving name of the institution, OCLC symbol, OCLC record number, action taken (add, update, or delete) and the date.

Steps for accessing your reports:

- 1) Log on to the OCLC Usages Statistic site <<http://www.stats.oclc.org/>> using an authorization number you use for local holdings maintenance.
- 2) Once logged on, be sure to choose the "online cataloging" tab.
- 3) Expand the "institution" link to see the Local holdings Maintenance reports.
- 4) If Local Holdings Maintenance work was done during the time period indicated in the "period" display, the LHM reports will appear under the "institution" link.
- 5) Click on report you wish to view.

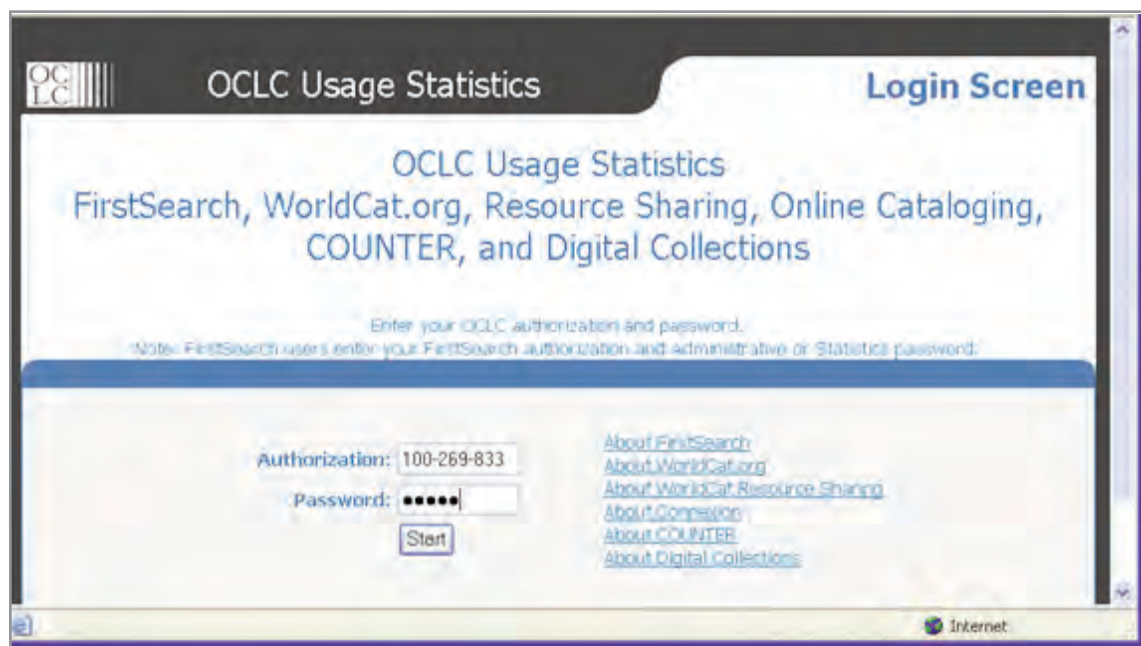

For Agents:

To access your agent reports, follow the steps above logging on using your agent authorization number used for Local Holdings Maintenance work performed on behalf of your client institutions.

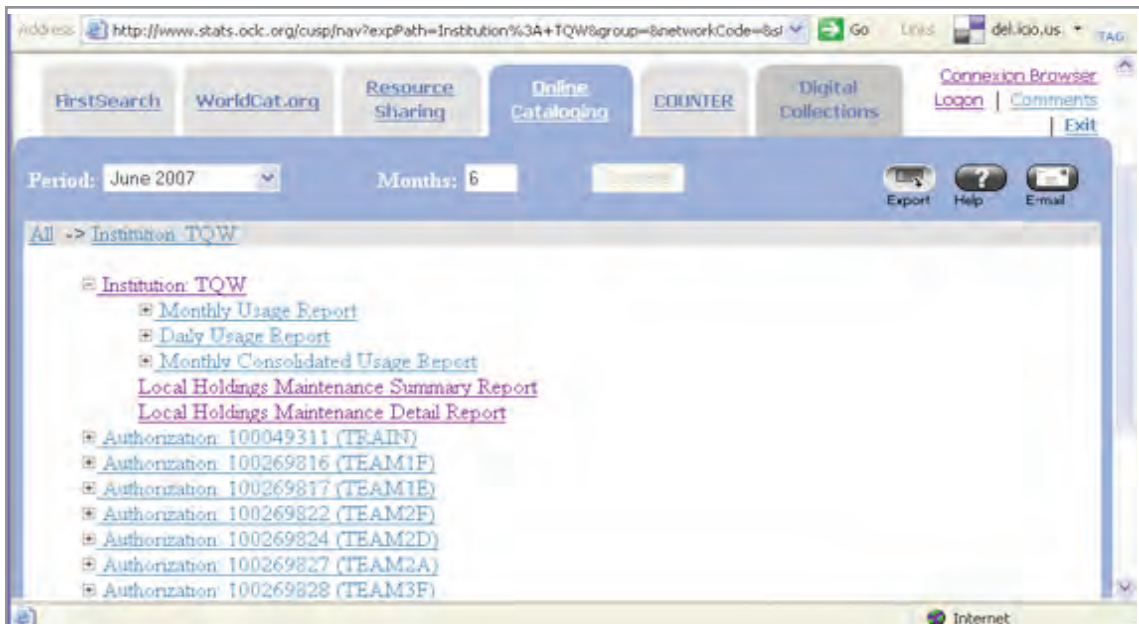

Time period:

You can alter the period of coverage for the statistics by clicking the "period" display (near the top of the screen); then click "update."

OCLC WorldCat Collection Analysis: New "Quick Start" Guide

OCLC announces a new resource for recent WorldCat Collection Analysis (WCA) subscribers. OCLC has developed a WCA Quick Start guide with the aim of helping new subscribers experience a couple of "quick-wins" using the tool. New subscribers will receive a link in their WCA welcome email to the Quick Start landing page, at <<http://www.oclc.org/support/documentation/collectionanalysis/scenarios/default.htm>>.

Here new subscribers can choose from six brief scenarios (three for individual subscribers and three for group subscribers). These scenarios illustrate some basic tasks that can be accomplished by any new user. These tasks are designed to familiarize new users with the WCA interface and stimulate their interest in more advanced features available via the WorldCat Services Administrative Module.

More advanced user education resources like Best Practices Scenarios and WCA Speakers Series presentations are available on the WCA home page at: <<http://www.oclc.org/collectionanalysis/default.htm>>.

For more information about WorldCat Collection Analysis, contact Lauren Pinsley (pinsleyl@nylink.org) or Jennifer Hawkes (hawkesj@nylink.org) at Nylink. You may also wish to visit <<http://www.oclc.org/collectionanalysis>>.

OCLC WorldCat Collection Analysis Enhancements: New Graphing Capabilities and New Limit by Call Number

OCLC is pleased to announce the following enhancements to WorldCat Collection Analysis.

- You can now graph your analysis results by column (in addition to graphing by row). This makes it easier to graph data across multiple criteria (e.g., holdings in a publication date range by subject; holdings by subject in a particular format).

- You can now limit your analysis by LC, Dewey, or NLM call number. This allows you to quickly drill down to the most granular level of the Conspectus that contains the call number you are interested in.

Column Graphing

To see a visual representation of your analysis results, simply click on the graph icon above the column data you would like to graph.

Limiting by Call Number

No matter what analysis you are running (My Library, WorldCat Comparison, ILL Analysis, Peer Comparison, etc.), you can search by a particular call number by clicking on the Limit Analysis button and typing your call number of interest. Then click Run Analysis. Your results are instantly limited to the most granular level of the Conspectus that contains your call number.

For more information about WorldCat Collection Analysis, contact Lauren Pinsley (pinsleyl@nylink.org) or Jennifer Hawkes (hawkesj@nylink.org) at Nylink. You may also wish to visit <<http://www.oclc.org/collectionanalysis>>.
